

SPK

DOKUMENT
ONE

SPK - DOCUMENT 1.

Thank you for your interest. This is the first in a series of documents, with the intention of providing a visual interpretation of SPK to accompany standard vocal output. This particular Document is expressly intended for use with the first LP by SPK, Information Overload Unit.

Details - Personnel;

Operator - synthesizers, rhythms, treatments, vocals.

Wilkins - guitars, bass, tapes, vocals.

Mr. Clean - technician.

Tone Generator - synthesizers, treatments.

Details - Content;

Face Ultra - Resonance Machine H.Cie 1914. Schere Discussion.

Sacht Schreien. Berufsverbot.

Face Hyper - Grand Zero: Infinity Dose. Staschkin Torturhammer.

Defekt. Epilepti:Gervase. Kaltkrachig:Idiotie.

The project ideal is to express the content of various psycho-pathological conditions, especially schizophrenia, manic-depressive psychosis, mental retardation and paranoia.

Information Overload encompasses normal, rational thought

structures, forcing revision into less restrictive mental

procedures of so-called 'mental illness'. SPK is trying to

be a voice for those individuals condemned by the slow decay

of mental hospitals and chemical/electro/surgical therapy.

Without fetishizing them into blatant entertainment product.

'SONICS FOR SARCAS' also to be a vehicle for sharing

mental experiences through sound.

Owing to the instability of personalities associated with SPK output is likely to be irregular, as it has been up to now.

We would like to hear from anyone interested in what we are doing, especially those with interest in, or history of, psychotic disorder. We will reply personally to all correspondence. Our name and material will vary with each project, but once established, you will have no difficulty in maintaining contact.

Please write to either

Mike Wilkins,

15, King Edward's Road,

Wickney,

London E9 15P

Or leave a message with Industrial Records, to whom, as ever, our thanks. Thanks also to BK, JK, MI, LGS, PIP, SP and L.

Love,

SPK.

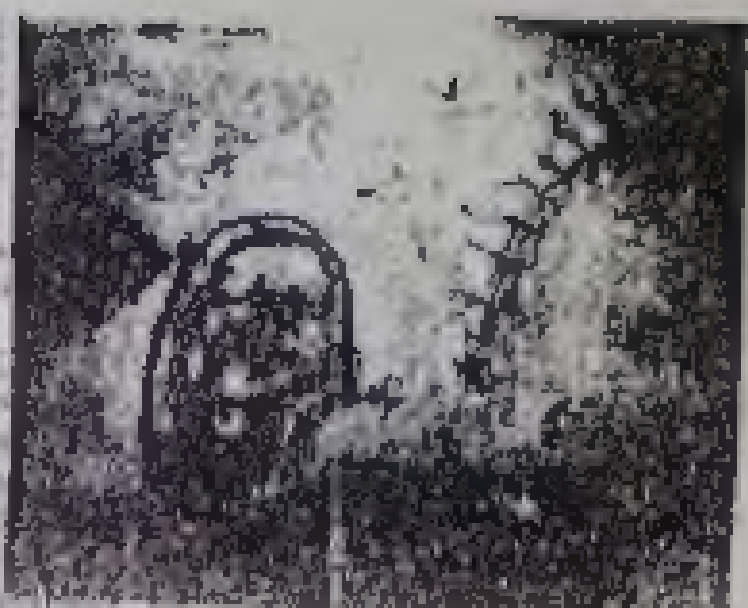

"The mean I.Q. of 'fighters' was 91; for 'non-fighters' 79. But the mean I.Q. of the whole group of combat soldiers was 85, i.e., 15 points below the average. In other words, the less intelligent men are those sent into combat & the more intelligent among them are the better fighters, though they are still well below average."

"Almost 50% of psychoneurotic soldiers were in the army for over 18 mths, and 72% because NCD's of some sort. In fact, psychoneurotics were 50% more likely to be promoted to NCO than normal privates."

"'Fighters' were less ectomorphic and more mesomorphic than 'non-fighters', on average an inch taller and 6 lbs heavier. The first sexual experience occurred a year later for fighters, (15 yrs 8 mths against 14 yrs 1 mth). The fighter has faster reflexes and performs much better in pencil maze and mirror drawing tests. Very few first-born children make good fighters, being shy and later more anxious."

...a motorist pulled
 aside a car and was
 involved in a 90 mph
 police chase. After
 driving several miles
 at breakneck speed he
 crashed into a wall
 when he was pulled from
 the wreckage he had
 substantial head
 injuries. For doctors
 say that by a million
 to one chance the metal
 of the windshield
 surrounded gave him an
 unsightly laceration
 and the patient is not
 well enough to be
 discharged from the
 mental hospital.

1950s REACTION TRAINING, name of Loyalty film. Time it was shown at the Neuropsychiatric Lab. in San Diego. The man are shown a series of gruesome show up the consequences of the films which became steadily more horrible-people were still making a lot of the trainees is forced to watch by having them were being captured. Post was the head clamped so he cannot turn away. Doc John's theory, bill or had ed by the use of a device which keeps, vision, the soldier's head up and is eyelids open. One of the first films showed their own com and have an African youth being circumcised. It was, not, but, it was a blunt knife and without anaesthetic. It recorded when the film is over, the trainee is asked questions like "What was the motif on the wife handle?" or, "How many people were olding the youth dead?". It appears this technique was particularly employed towards the end of 1973, at the time of the Yom Kippur war. So, far from using research to prevent atrocities occurring in the future, it appears that atrocities are being studied to learn about them.

are about killing, and to train people in popular belief, so as to be better at it, one of eight common Communist exercise methods for achieving individual compliance. The eight are shown in Table 23.

Table 16. Continued exercise methods for $f_{\text{min}}^{\text{min}} = 0.001$ and $\epsilon = 10^{-6}$

A technique used to exploit the need to communicate is to spend hours asking and shouting questions to which the prisoner cannot possibly know the answer - details of atomic weaponry etc. Many ex-prisoners speak of the "...tremendous feeling of relief you get when he finally asks you something you can answer."

The Russians were reported to have used succinyl chloride on Israeli prisoners in Syria, 1973. The drug, administered by injection, causes convulsive muscular spasms, leaving the victim totally paralyzed, in agonizing pain, unable to breathe properly, but conscious. The victim feels himself dying for lack of oxygen, although the effect is temporary, but there is then the threat of a repeat experience.

-------------------	--	-----------------------------------	---------

Operation Black Eye is a good example of psychological threat manipulation. Selected South Vietnamese operations were organized into terror squads, trained to infiltrate villages. As a result, Viet Cong leaders started dying in their beds.

days and for
and almost 100
down hanging
in the door

On each of the bellies was a piece of paper
printed with a grotesque human eye, which
came to represent a threat. And, 90,000
of the eyes were printed by the USA and
started appearing pinned to people's homes.
Now the eye took on a more potent form, and
because it was an uncertain threat.

Fig. 2. A mixture of equal

Following the appearance of the Boulder-
Reichhof group, the Germans developed long-term
military confinement units known as *Isolation*
Treat (Silent Floor) in which all walls and
furniture were painted harsh white, the lights
were permanently on, and the windows were dark,
and extremely difficult to see through. This
system led to Holger Meins starving himself to
death and to Holmbein's suicide by hanging in
May 1976.
